## PROFESSIONAL COUNTERTOP BROILER

- Individual controlled 22,000 BTU stainless steel burner.
- Burners are located every 6" for even heating throughout the full width of the broiler.
- Removable cast iron radiant covers for easy cleaning. Stainless steel radiant covers are a not cost option when ordered at the time of the unit.
- Newly designed 4 position cast iron top grates are standard and offer various height options throughout the width of the broiler.
- Full width grease gutter with large grease chute to drip pan.
- Full width stainless steel extra deep drip pan.
- All control components are made from solid brass.
- Available in either floor or countertop models.

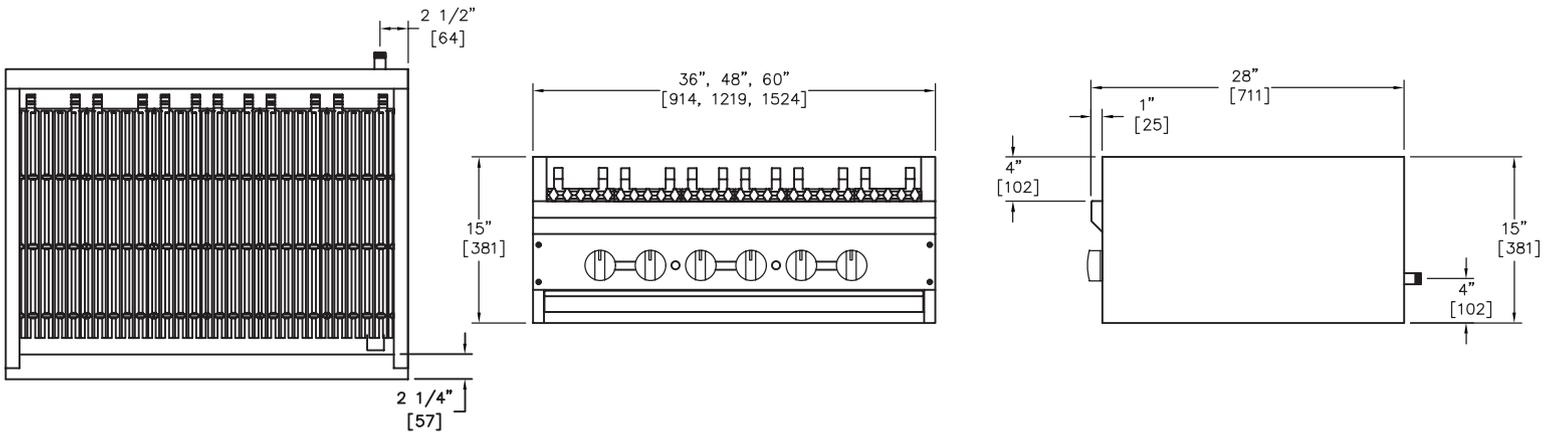

## EXTERIOR FEATURES

- Designed and built with heavier gauge 304 stainless steel for durability and long service life.
- All seams are 100% welded and polished.
- Newly designed die cast metal knobs for ease of use.
- Designed so it can be used on refrigerator base.
